

DA1421 Amulette Telephone

Silent Alarm

Safety

Security

It is a horrible scenario: it's night and you hear strange noise. Understandably, women feel particularly threatened. In such situation you want to stay undetected and call for instant help.

Silent Alarm

very efficient application at raids on small shops, especially gas stations.

Smoke Alarm Detection

in case of smoke or fire

A world-first method is applied to reliably identify alarms of all smoke or heat detectors. You simply use your existing smoke detector.

Detect Smoke Alarm is instantly operational emergency call is automatically activated

handsfree telephone

comfortable handsfree calls

If your personal telephone list is defined including names, telecommunication will be very comfortable and easy. The Voice Assistant is reading the names:

„Tim ruft an“

Premium audio quality in handsfree Telephony at the push of a button

German Engineering

The miniFon DA1421 has been developed by DOSCH&AMAND, the Co-inventor of the radio telephony standard „DECT“

Simple commissioning

The miniFon is a high-tech DECT telephone. It automatically registers to your home-based DECT System:

There are no further devices, accessories or Apps necessary. Commissioning will take less than five minutes, without any special knowledge.
