

## DA1432 Emergency Call

including reliable

### Fall Detection

### the good feeling of safety

To be suddenly alone at home is not an easy life. Therefore we should take all means, to facilitate such life, make it more pleasant but especially make it safe. There is always something which can happen.

Often senior people need help in daily life problems. But also in case of emergency, it is most convenient and effective if first help is coming from neighbours, friends and family

### „we help eachother“

Additionally you can define an Emergency Number which will be called as fallback

## Fall Detection

reliable method with best rating

The most serious thread for senior people alone at home is falling down.

„did you fall ?“  
„help will be called “

Reliable fall detection  
due to novel method (world-first)

Fall Detection is instantly operational.  
Emergency call is automatically activated

## Smoke Alarm Detection

in case of smoke or even fire

A world-first method is applied to reliably identify alarms of all smoke or heat detectors. You simply use your existing smoke detector.

Detect Smoke Alarm is instantly operational.  
Emergency call is automatically activated

## Help at the push of a button

„ we help eachother „

The Pendant can handle 3 help numbers and 1 emergency number.

All help numbers will dialled sequentially and repeatedly until a contact has been found. The Call Sequence is associated by the Voice Assistant.

Optionally a further Emergency Number can be defined. This number will be called in case of no help contacts have been found.

### stay in contact

comfortable handsfree telephone

If your personal telephone list is defined including names, telecommunication will be very comfortable and easy. The Voice Assistant is reading the names :

„Susan is calling“

Premium audio quality in handsfree Telephony at the push of a button

## Reminder Function

Help at forgetfulness

The Pendant can handle up to five reminders per day.

You define Timings and Reminders. The Voice Assistant is reading the Reminder at defined time.

*„Mam, please take medication“*

## the Voice Assistant

makes everthing easy and understandable

The integrated Voice Assistant (iVA) is a very special and valuable feature of the Pendant. iVA gives important hints, reads names from telephone list, calms down in hazard situations, informs emergency contact about situation, person and location,....

*„please charge battery“*

*„this is a fall alarm at <.....>“*

*„Smoke Alarm Detection has been activated“*

.....
